

# Cracking the Safe - Solution

By Eshan Mitra and Sara Walker

Match each answer to one of the given dials using the clues on the dials. With all five answers, the mapping should be clear, but there is some ambiguity if you have incomplete information.

The middle answer alphabetically: HYDRAULIC

The two-word answer containing the longest word: THE ORACLE

The answer with the highest Scrabble score: CAJUN FOOD

The lightest answer by weight (that has a weight): TAROT CARD

The one-word answer with the most syllables: DEODORANT

Enter each answer on the corresponding dial. Turn the dials (using trial and error, as though cracking a safe combo) to spell out answers to the three clues provided around the safe.

Job: CHORE; A constellation: DRACO; A car: ACURA

In this position, the dial segments with the arrows spell the answer, LEFT THE DOOR AJAR.
